

CAREER PROGRAMS

Southwest Technology Center is under the administration and supervision of a duly elected board of education in cooperation with the Oklahoma Department of Career and Technology Education. The board of education recognizes that there is no one best way to educate students. Every student should be allowed the opportunity to learn in a situation that will encourage maximum development of abilities and skills. Therefore, this school serves as an extension of the school districts that are members of the area career-technology center district. Southwest Technology Center is a part of the total education program of these communities. High school students applying for training must be students in good standing at their home schools and have approval of parents, home schools, and Southwest Technology center prior to enrollment.
