

SCHOOL BUS ROUTES

Southwest Technology Center's transportation system includes at least three (3) routes and sometimes more, depending upon the student enrollment each semester. The routes run between the local high school(s) and the Southwest Technology Center campus, and between the main campus at 711 W. Tamarack and the Aviation and Aerospace Program located at Altus/Quartz Regional Airport, three miles north of the main campus. A listing of bus routes, the high school(s) served, and the scheduled departure times will be on file in the administrative office. Temporary routes may be established to serve post-secondary students involved in industry training programs.
