

**HEALTH:
STUDENTS**

The Southwest Technology Center Board of Education believes that the goals of educators should include training that helps our children to grow into productive and responsible adults.

While the general health and physical maintenance of a child is the responsibility of the parent, the board believes that teachers and administrators should encourage students to become aware of the value of a healthy mind and body.

If a teacher or an administrator becomes aware of a health problem involving a student, the parents or legal guardian of the student shall be notified and a conference with the parents be scheduled. If efforts to resolve the problem through consultation with the parents are not successful, the administrator shall consider referring the matter to the Department of Human Services.

Health education shall, whenever possible, be incorporated into the subject matter of all courses of instruction.

Any child who is determined to be afflicted with a contagious disease, as currently defined by the Oklahoma Department of Health, or with head lice shall be prohibited from attending school until a health officer has determined that the child is free of head lice or the contagious disease or that the disease is no longer contagious.

On the same day an accident occurs, accident forms must be completed by the teacher under whose supervision the accident occurred and placed in the student's file in Administration.

An informational copy of the Accident Report Form will be given to the director of full-time programs and an official copy to the director of business and industry services, who serves as the safety officer for Southwest Technology Center.
